

# RETAIL

## Three Zones with Background Music and Announcements

### System Overview:

In this retail application, the system is divided into three zones with a central Dante audio source. Analog wall controllers provide local volume control for each zone. A Dante announcement microphone can be used to provide all zone announcement by utilizing Mezzo's priority inputs capability that is available in the source selection of the DSP.

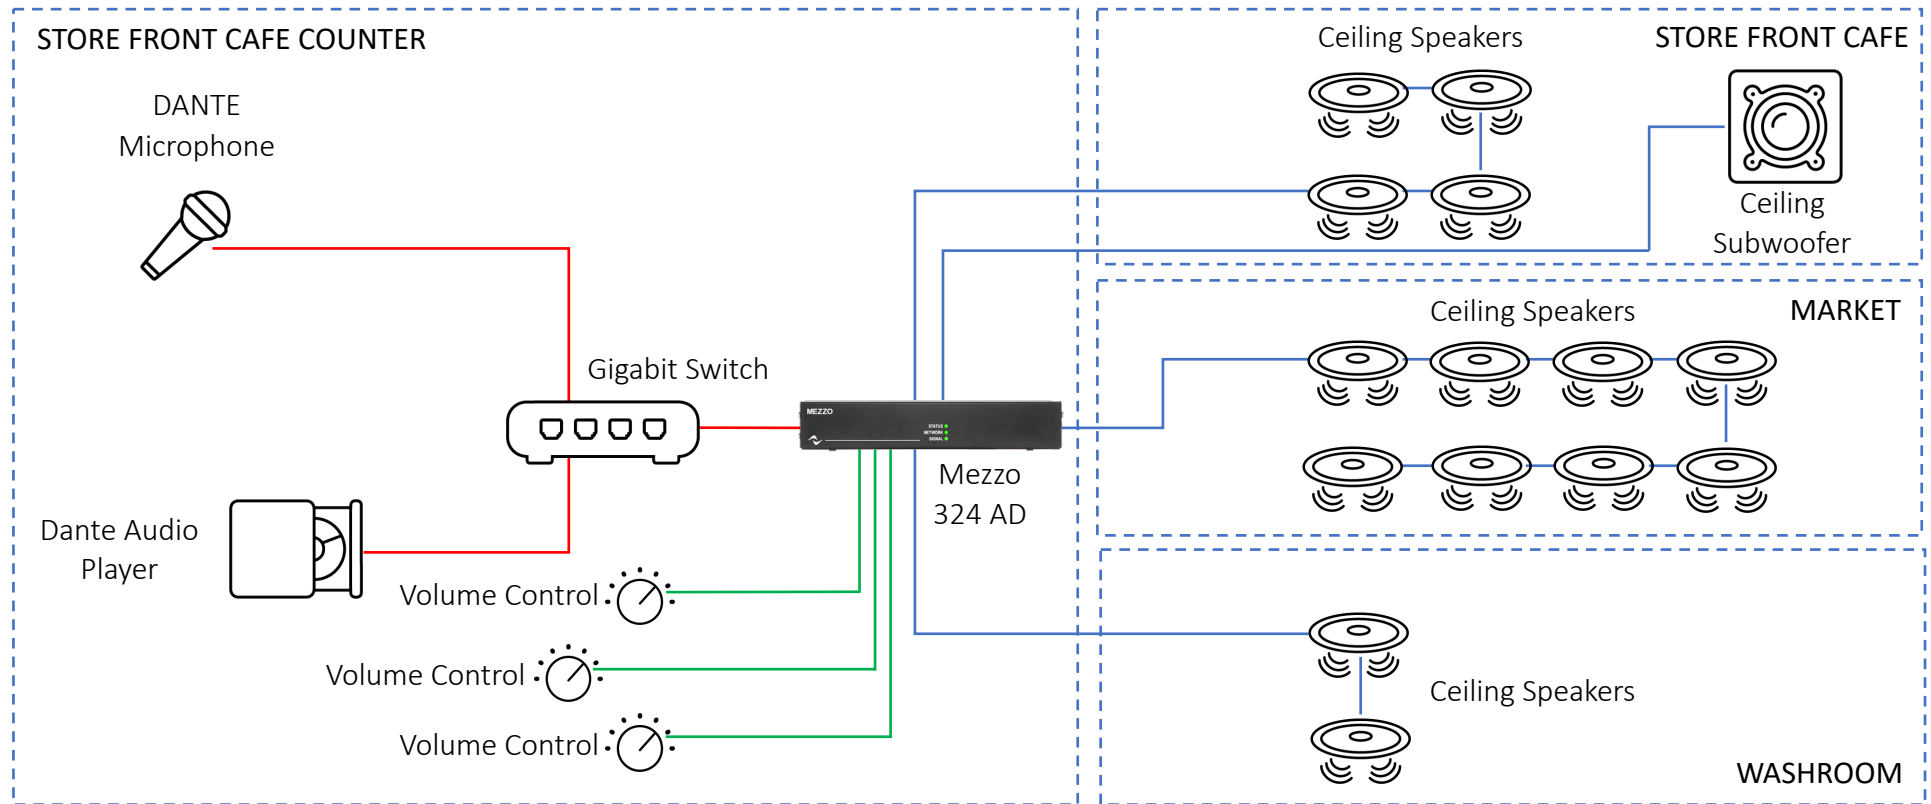

### Key Features:

- Full power sharing allows for flexible use of sub-woofer and high impedance loudspeakers.
- Using the priority capability of Mezzo's source selection, a Dante microphone can be used to provide all call functionality.
- Analog volume control enables the user to control the zone's local output to match the ambiance.
- The compact size of Mezzo enables it to be mounted in a space constraint area like a reception desk.
