

SMALL CONFERENCE ROOM

Small Conference application with volume control

System Overview:

This compact conferencing application offers full flexibility to connect any Dante or analog input to a very compact and efficient system. Efficiency is combined with price reduction by routing computer audio with HDMI to the projector and extracting the audio feeds from the outputs provided by the project this system. All source selection and volume control is handled by the internal GPI and eliminates the need for additional equipment.

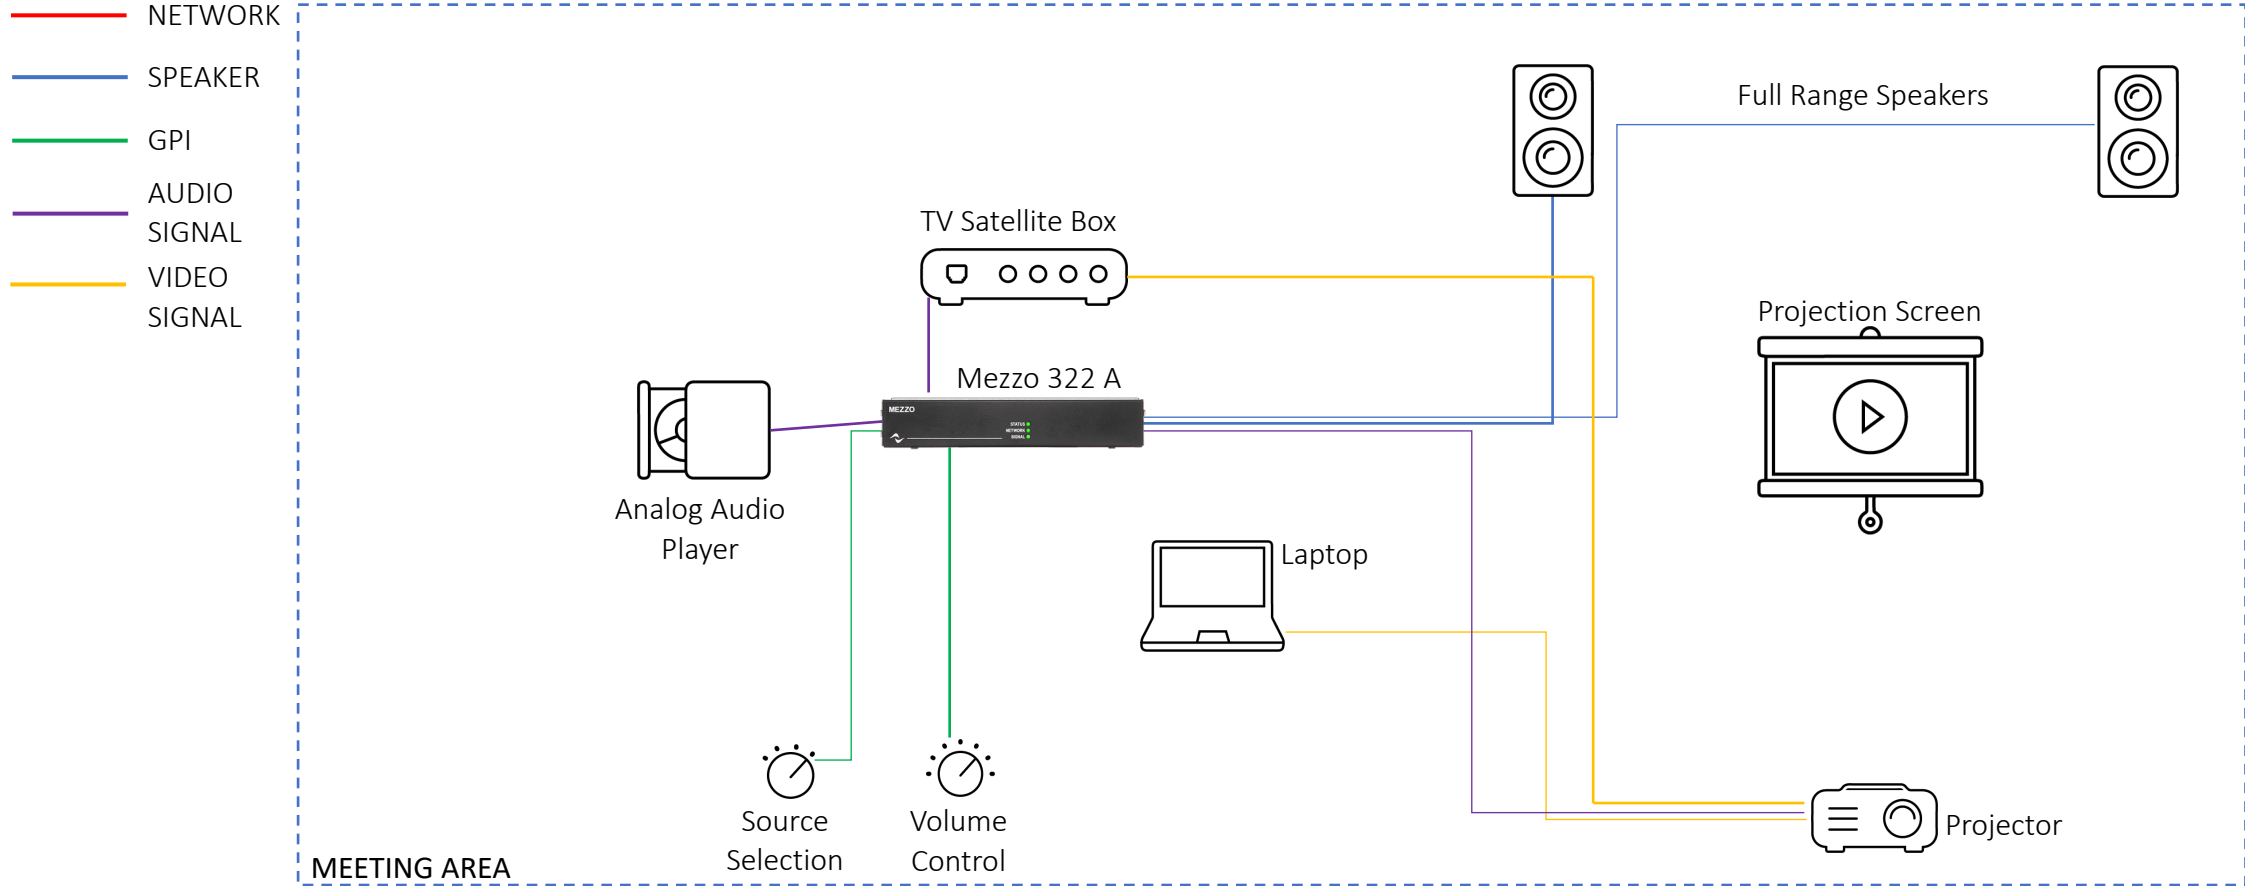

Key Features:

- 4 Dante and 4 analog inputs on a 2 channel amplifier
- HDMI de-embedding in projector and to mini-jack of MEZZO
- Straight forward and cost-efficient source selection using GPI
- No audible fan noise from convection cooled amplifier
