

## RELEASE NOTE

---

ARMONÍAPLUS 2.7.1

## ArmoníaPlus Rev 2.7.1

This document highlights the latest additions in the release of ArmoníaPlus 2.7.1, available from September 11, 2024.

### What's New in ArmoníaPlus 2.7.1?

The latest update to ArmoníaPlus, version 2.7.1, introduces a host of new features designed to streamline the patching process between Powersoft's *Unica*, *Quattrocanali DSP+*, and *Duecanali DSP+* models and the Dolby Atmos processor.

- **Network Integration**  
Input network details for the Dolby Atmos Cinema Processor CP950A or Dolby Integrated Media Server IMS3000 into ArmoníaPlus, and the system will automatically manage all AES67 audio streams and channels.
- **Seamless Connectivity**  
With support for Dolby Atmos Connect AES67, ArmoníaPlus removes the need for additional external devices or software, simplifying the process.
- **Direct Patching**  
Powersoft amplifiers can now be directly patched to the Dolby Atmos Cinema Processor CP950A and Dolby Integrated Media Server IMS3000, ensuring a straightforward and hassle-free setup.
